

Alumni Speaks

Textile Technology & Management (full time)

Manave Kumar

The TTM program is just the right option for somebody who wants to acquire in-depth knowledge on textile supply chain starting such as spinning, weaving, knitting dyeing and quality control.

Textile Design & Quality Control

Ranu Jain

The program deals with comprehensive training on Dobby, jacquard, printing and embroidery CAD software. The program helped me to acquire the design skills which are very important for success in professional life.

Garment Technology & Management (DLP)

Devraj Singh

Joining GTM in distance learning mode enabled me to update myself with latest developments and implement the same in my export house. The faculty is highly knowledgeable in their respective fields.

Garment Technology & Management (full time)

Shabi

This program provides a gateway to the Indian apparel industry. Curriculum is very much industry relevant. Theory classes are well supported by practical training on excellent lab facilities.

Apparel Machine Engineering & Maintenance

Santosh Kumar

Practical classes are the backbone of this program. I am very satisfied because NITRA faculty teaches both the theory and practical aspects of the program with equal flair.

Apparel Merchandising & Export-Import Management (DLP)

Sushma Chaudhary

Contact classes are very lively and relevant. It is sure to set one's confidence level on a high note and ensure career enhancement.

Apparel Merchandising & Export-Import Management (full time)

Kanika Verma

Inputs provided in this program enabled me to become a good merchandiser. The program covers in detail merchandising functions and provides relevant inputs on apparel manufacturing, marketing, and export-import topics.

Garment Dyeing, Drycleaning & Finishing Technology

Vijay Kumar

Garment dyeing, drycleaning and finishing is a very specialized area. It was a great experience for me to undergo training in this program where we were exposed to latest technologies of this particular field.

Apparel Design & Quality Control

Ankit Chaudhary

The program provides excellent exposure on pattern making and CAD software on one hand, and quality control aspects on the other. Convenient class timings are another plus point of this program.

Textile Technology & Management (DLP)

Rajesh Kumar

TTM -DLP program is very helpful for those who are engaged in textile mill operations. The practical training as well as the contact classes at NITRA is very useful and beneficial.

Quality Evaluation of Textiles & Garments (DLP)

Surender Kumar

Quality control operations are of great importance to textile and garment industry. The practicing quality controllers must do this program to remain updated in their own field and maintaining product quality at an international standard.
